Done. Item 136 was verified against the [official repository ↗](#), [official dataset ↗](#), and [IFEval paper ↗](#).

Result: 9 bullets, 50 words, 2/2 constraints, 1/1 strict local pass. The PDF accurately records Codex as the runtime; Luna Max was not independently verified. The official evaluator was unavailable.

Completed. Item 1325 was verified against the [official dataset](#), [repository](#), [checker source](#), and [IFEval paper](#).

Result: 2/2 constraints passed; 1/1 strict prompt pass. One preflight correction was recorded. The official evaluator was unavailable, so the PDF is labeled LOCAL REIMPLEMENTATION – NOT OFFICIAL EVALUATOR and NOT INDEPENDENTLY VERIFIED. Runtime identity is recorded accurately as Codex, not asserted as Luna Max.
