

GROUNDING DI OS BENCHMARK RECORD

Grounded DI OS Benchmark Record

Google Research IFEval | Prompt 16 | Item key 1825

RECORD STATUS

INTERNAL

EVALUATION

LOCAL CHECK PASS

EVIDENCE

UNVERIFIED

Purpose and scope

This record documents one attempted response to official Google Research IFEval item 1825 under the FastPath 5.6 / Luna Max route. It preserves the source item, exact submitted response, checker behavior, local result, evidence status, and claim boundaries. It does not establish an official IFEval score, independent verification, or general model performance.

Run summary

Benchmark	Google Research IFEval
Benchmark version	Official master dataset retrieved 2026-08-26
Task / item	Prompt 16 / item key 1825
Official requirements	No commas; P.P.S. postscript; five required keywords
Model / route	FastPath 5.6 / Luna Max
Run timestamp	2026-08-26 14:16:45 EDT
Permitted tools	Official source verification; local equivalent check if needed
Actual tools used	GitHub source verification; public web source check; local Python check; ReportLab; Poppler
Preflight corrections	0
Evaluator	LOCAL REIMPLEMENTATION — NOT OFFICIAL EVALUATOR
Result	3 / 3 encoded constraints passed locally; 1 / 1 prompt-level strict pass
Evidence status	NOT INDEPENDENTLY VERIFIED
Prompt SHA-256	ee260bab3ecc404d512bbfc8677ea7921551ab3a2d9e9808356b941684917060
Response SHA-256	d76a33f679f69077f7977b9bfbf19d2e6b7c627c738fd9ebb65028587a1bc02f

CLAIM BOUNDARY

The official evaluator was not executed in this workspace. The recorded pass is a local equivalent result and is not an official benchmark score. The model / route is recorded directly as FastPath 5.6 / Luna Max.

Official Benchmark Provenance

SOURCE	URL	STATUS
Official repository	https://github.com/google-research/google-research/tree/master/instruction_following_eval	VERIFIED
Official dataset	https://raw.githubusercontent.com/google-research/google-research/master/instruction_following_eval/data/input_data.jsonl	ITEM 1825 MATCHED
Official checker	https://github.com/google-research/google-research/blob/master/instruction_following_eval/instructions.py	BEHAVIOR REVIEWED
Official paper	https://arxiv.org/abs/2311.07911	REFERENCE

Verification result

The current official dataset entry for key 1825 matched the supplied benchmark prompt exactly. It identifies punctuation:no_comma, detectable_content:postscript with marker P.P.S, and keywords:existence for lacking, model, performance, quality, and architecture. The official checker source was reviewed at commit 807d4a2f4120 for the P.P.S. regular expression, case-insensitive keyword search, and comma check. No source conflict was observed.

Exact benchmark prompt

Explain Generative Adversarial Networks (GANs) to me using bullet points. Do not contain any commas in your response. End your response with a postscript indicated by P.P.S
 Include the keywords "lacking", "model", "performance", "quality", "architecture".

The prompt above is the scored task. Audit text was excluded from the scored response.

Final Submitted Benchmark Response

The following block is the complete scored response. It is preserved exactly; no title, score, citation, or audit material was included in the submission.

* A generator creates data that resembles real examples.
 * A discriminator judges whether each sample looks real.
 * The generator learns from that feedback and improves.
 * The discriminator learns from real and generated examples.
 * This rivalry can produce sharp images and convincing audio.
 * With poor data the generator may learn a lacking pattern.
 * A strong model balances creativity with accuracy.
 * Training quality can improve performance and stability.
 * The architecture gives both networks competing goals.
 P.P.S GANs argue until the fake looks real.

Evaluation and Audit Trail

EVALUATOR STATUS
 Official IFEval evaluator: NOT EXECUTED. The official package and its dependencies were not installed in this workspace.

LOCAL REIMPLEMENTATION — NOT OFFICIAL EVALUATOR

Requirement	Official Standard	Observed	Result
punctuation:no_comma	No comma character anywhere	0 commas	PASS
detectable_content:pos_tscript	P.P.S. pattern detected using official multiline regex	P.P.S. detected	PASS
keywords:existence	All five keywords found case-insensitively	lacking: PASS; model: PASS; performance: PASS; quality: PASS; architecture: PASS	PASS

Score	Recorded Result
Instruction-level score	3 / 3 encoded constraints passed locally
Prompt-level strict score	PASS
Final recorded score	1 / 1 prompt-level strict pass
Official-versus-local discrepancy	NOT MEASURABLE because the official evaluator was not executed

Manual / Secondary Check

MANUAL TASK CHECK	RESULT
Clear bullet-point explanation of GANs	PASS
Postscript is placed at the end of the response	PASS
Response contains explanation content only and no audit material	PASS
No commas appear in the scored response	PASS

Official encoded constraints versus manual task checks

The official score consists only of the no-comma, P.P.S. postscript, and five-keyword existence constraints. Bullet-point format, explanatory quality, final postscript placement, and explanation-only presentation are recorded separately as manual checks and are not added to the IFEval score.

Preflight and blinding status

Private preflight corrections: 0. The response was drafted, inspected, and finalized without a correction.

INTERNAL RESPONSE-ONLY BLIND CHECK: YES

For the local check, the checker received only the response text and fixed constraint parameters; the audit narrative and score presentation were kept outside the scored response. This is an internal response-only blind boundary and not independent third-party verification.

Defects, ambiguities, and limitations

The official evaluator was not executable because the required package and dependencies were unavailable. Official-versus-local discrepancy is therefore NOT MEASURABLE. No benchmark defect or source conflict was observed. No independent reviewer or external evaluator verified this run.

Evidence status

NOT INDEPENDENTLY VERIFIED

Evidence consists of the official source retrieval, preserved prompt and response, local equivalent check, tool record, and this PDF. No certification, universal claim, representative-performance claim, or official score is made.

Record integrity

- Official benchmark source and item key were recorded.
- The final submitted response is preserved exactly in a separated block.
- The evaluator actually used is identified; the official evaluator is not represented as executed.
- Preflight corrections are disclosed.
- No post-score response change was made and no completed failed submission was hidden.
- The record does not claim certification, independence, universality, or representative model performance.

Hashes and timestamp are preserved in the Run summary table on page 1; the source commit is recorded in the provenance section.

FINAL STATUS: INTERNAL ONE-SHOT RECORD | LOCAL CHECK PASS | LOCAL REIMPLEMENTATION — NOT OFFICIAL EVALUATOR | NOT INDEPENDENTLY VERIFIED
