

GROUNDING DI OS BENCHMARK RECORD

Google Research IFEval | Item key 1980 | Prompt 19

INTERNAL ONE-SHOT RECORD	LOCAL CHECK PASS	NOT INDEPENDENTLY VERIFIED
--------------------------	------------------	----------------------------

Purpose and scope

This record documents one completed one-shot response for IFEval item 1980. It preserves the exact scored response, local check results, hashes, and claim boundaries. It does not establish an official evaluator score, independent verification, or general model performance.

Run summary

Benchmark	Google Research Instruction-Following Evaluation (IFEval)
Task / item	Prompt 19 IFEval item key 1980
Requirements	At least 300 words; exactly 3 asterisk-marked Markdown bullet lines; terminal P.S. postscript
Requested route	FastPath 5.6 / Luna Max
Observed runtime	Codex; exact model identifier is not exposed in this runtime
Run timestamp	2026-08-26 16:22:06 EDT
Evaluator	LOCAL REIMPLEMENTATION - NOT OFFICIAL EVALUATOR
Evidence status	NOT INDEPENDENTLY VERIFIED

Route / runtime boundary

The requested route is recorded as FastPath 5.6 / Luna Max. The observed runtime is recorded separately as Codex because the exact underlying model identifier is not exposed by this runtime. The route label is not used to infer a hidden model identity.

Benchmark provenance

The authoritative scored task and item identifier were supplied in the execution wrapper. The item is recorded as IFEval 1980 with three encoded requirements: number_words at least 300, number_bullet_lists exactly 3, and a postscript beginning with P.S. at the end.

Official dataset	https://raw.githubusercontent.com/google-research/google-research/master/instruction_following_eval/data/input_data.jsonl
Official checker	https://github.com/google-research/google-research/blob/master/instruction_following_eval/instructions.py
Official evaluator	Not executed in this runtime

Exact benchmark prompt

Write a blog post about the sleek new magistrates with at least 300 words. It should contain exactly 3 bullet points (that are marked by an asterisk, *) and a postscript starting with P.S. at the end.

Scored-response boundary

Only the frozen response reproduced on the next page is scored. The PDF, grade, hashes, and audit narrative are sidecar artifacts and are not part of the scored response.

Final submitted benchmark response

The block below is the complete frozen scored response. It contains only the blog post and is preserved exactly as finalized.

Imagine walking into a courthouse and seeing a new generation of sleek magistrates taking their seats. Their polished robes and modern chambers may attract attention. Their real importance however comes from how they exercise judgment. A magistrate is not made effective by appearance alone. A fair process requires patience clarity and independence. It also requires the humility to hear people whose lives may be complicated. The sleek design can be useful when it makes public institutions feel open rather than intimidating. Technology can help organize files and reduce avoidable delays. It cannot replace careful listening or principled reasoning. A modern courtroom should feel efficient without becoming mechanical. The magistrate must remain attentive to the human consequences of every decision.

A blog post about new magistrates should therefore ask what kind of modernization actually matters. Faster scheduling is valuable when it gives people a meaningful chance to prepare. Clear explanations are valuable when they help everyone understand what happened. Consistent procedures are valuable when they reduce arbitrary treatment. A sleek institution should make those benefits visible in everyday practice. It should not use attractive language to conceal confusing rules. It should not treat efficiency as permission to rush difficult questions. Nor should it assume that a new system is automatically a better system. The best magistrates can use new tools while remaining answerable to old principles of fairness.

- * First impressions matter because a welcoming courtroom can encourage people to participate honestly and calmly.
- * Reliable procedures matter because predictable steps help people understand both their rights and their responsibilities.
- * Human judgment matters because no polished interface can decide every difficult question without context or care.

The phrase sleek new magistrates is most useful when it describes a public institution that is contemporary in form and serious in purpose. A magistrate should be comfortable with digital records and remote communication. A magistrate should also know when a person needs an explanation instead of another form. Professional confidence should never become impatience. Visible efficiency should never become pressure to treat people as numbers. The public deserves decision makers who can balance speed with deliberation. That balance is harder than a renovation project. It depends on training supervision and a culture that welcomes correction.

Ultimately the new look is only a promise. The promise becomes credible when magistrates apply rules consistently. It becomes stronger when they explain their reasoning in language ordinary people can understand. It becomes durable when the institution measures success by fairness as well as volume. A sleek courthouse can be impressive. A trustworthy courthouse is better. The most successful magistrates will make both qualities work together.

P.S. The sleek new magistrates should be judged by fairness as well as appearance.

Response integrity

Response SHA-256: 824e0ae66575ee5a9d66ae782a6e152857ac8ae74970211ae37eb62e79a16674

Hash input: exact frozen response encoded as UTF-8 with no added trailing newline.

Evaluation and audit trail

The official evaluator was not executed. Results below are transparent local equivalents of the three encoded checks and are not presented as an official benchmark score.

REQUIREMENT	OFFICIAL STANDARD	OBSERVED	RESULT
number_words	At least 300	450	PASS
number_bullet_lists	Exactly 3 Markdown bullet lines	3	PASS
postscript	P.S. marker at the end	terminal P.S. present	PASS

Instruction-level score	3/3 encoded constraints passed locally
Prompt-level strict score	PASS
Final recorded score	1/1 prompt-level strict pass (local result)
Preflight corrections	0

Manual / secondary check

The frozen response contains 450 words. It contains exactly 3 Markdown bullet lines beginning with an asterisk. Its final non-empty line begins with P.S. The scored block contains no audit material.

Limitations and claim boundaries

Official evaluator status: no executable official evaluator was available or executed. Official-versus-local discrepancy is NOT MEASURABLE. The local checks reproduce the encoded constraints but are not the official evaluator. This record does not establish legal, factual, general, or universal model performance.

Record integrity

The final scored response was frozen before grading. No post-score response changes were made. The completed PDF SHA-256 is computed after final PDF writing and is recorded in the separate SHA256SUMS.txt sidecar. The PDF hash is intentionally not embedded in the PDF itself to avoid circular self-reference.
