CERTIFICATE OF PROVISIONAL BENCHMARK AUDIT COMPLETION

Freshworks FY2023 Master File — Original-Mission Review

Review record dated 16 October 2026

89 / 89 Applicable Review-Weight Points

100% Original-Mission Substantive Completion

Provisional Internal Assessment — With Disclosed Reservations

These are weighted points, not 89 independently counted criteria.

Based on the supplied matter record and the documented review of the original Freshworks FY2023 drafting mission, the completed Master File satisfied the retained substantive and production acceptance requirements, earning 89 of 89 applicable review-weight points.

CHECKPOINT LEDGER

Checkpoint field	Recorded result
Matter	Freshworks Group Master File — FY2023
Reporting period	Financial year ended 31 December 2023
Deliverable	Freshworks Group Master File — FY2023.docx
Review basis	Original mission requirements and supplied matter evidence
Applicable review-weight points	89
Points earned	89
Completion percentage	100%
Points excluded from the later reference scale	11
Material prohibited assertions identified	None identified in this review
Disposition	Substantive mission completed; minor drafting reservation disclosed
Official benchmark-operator evaluation	Not performed

DISCLAIMER

This certificate records a provisional internal AI-assisted assessment of the Freshworks FY2023 mission. It is not an official benchmark-operator evaluation or an independent third-party audit, legal or tax opinion, assurance opinion, filing-readiness determination, or guarantee of factual or legal correctness. The result applies only to the identified deliverable, disclosed scope, reconstructed denominator, and stated reservations.

SCOPE DISCLOSURES AND EVIDENCE BINDING

Freshworks FY2023 Master File — Original-Mission Review

DENOMINATOR DISCLOSURE

The 89-point denominator was reconstructed during the subsequent original-mission review. Eleven points were excluded from a later 100-point reference scale because they concerned additional details, duplicated claims, or added placement requirements. The exclusions are documented individually in the accompanying review. They were determined after the deliverable existed and do not constitute a blinded or prospective evaluation. They do not mean that eleven points of the original benchmark were proven impossible.

This reconstructed denominator is not an original published benchmark score. BriefWise did not have the later Deterministic v2 scoring instructions during the original work; no later benchmark score is attributed to its contemporaneous audit.

RESERVATION

Section 6 retains template wording suggesting that supporting Local Files were provided, although their delivery is not established by the supplied record. That wording should be clarified before external reliance. The reservation does not change the substantive mission-acceptance result.

EVIDENCE BINDING

Reviewed deliverable: Freshworks Group Master File — FY2023.docx

SHA-256

PRODUCTION VERIFICATION

The reviewed DOCX hash matched the previously rendered 23-page file. The current review checked package integrity, specified placeholders, and contact sheets of all pages. It did not repeat a fresh full-resolution rendering audit.

RESULT BOUNDARY

The result concerns the identified Freshworks FY2023 deliverable and the original mission requirements assessed in the accompanying review. It is subject to the denominator disclosure, reservation, and production-verification limits stated in this certificate.
