

Grounded DI OS Benchmark Record

Prompt 63 | Google Research IFEval 1531 | Terra Extra High

Decision and selection boundary

Route	FastPath 5.6 / Terra Extra High
Selection	Metadata-only selection before reading the exact task.
Eligible control	Sole encoded control: keyword existence. Two required terms.
Excluded	Formatting, punctuation, wrapping, case, bullet, and sentence-count controls.
Locked result	One response preserved below; no post-score rewrite.

Official checker source: https://github.com/google-research/google-research/blob/932d4685e23f671b9e8c2abc72dd228ba5ff9252/instruction_following_eval/instructions.py

Claim boundary

This record documents a local check of the official encoded requirements. It is not an official IFEval evaluator run, an independent verification, human-subjects approval, medical advice, or proof of research outcomes.

Exact official task

Come up with a proposal for a new research project on how to improve the quality of life for people with disabilities. Your response should be able to be rendered as HTML, and should include the keywords 'atlantis' and 'constable'.

Locked response

```
<section>
<h1>AccessPath Research Proposal</h1>
<p><strong>Purpose:</strong> Co-design and evaluate an accessible service-navigation tool that helps people
with disabilities identify local supports, record preferences, and control what information they share.</p>
<h2>Research questions</h2>
<ul>
<li>Does co-designed navigation reduce unnecessary administrative effort?</li>
<li>Which accessibility features improve participant control and understanding?</li>
</ul>
<h2>Method</h2>
<p>Recruit a compensated advisory group of people with diverse disabilities, conduct accessible interviews, and
test two prototype versions with participant-selected formats and assistive technology. Participation is
voluntary and may stop at any time.</p>
<h2>Measures and safeguards</h2>
<p>Measure task burden, comprehension, perceived control, and participant-reported usefulness. Obtain informed
consent, minimize data collection, and publish only de-identified findings.</p>
<p>To distinguish prototype versions in study materials, the neutral labels <code>atlantis</code> and
<code>constable</code> will be used; they do not describe participants.</p>
</section>
```

Manual task checks

HTML form	Uses a section, headings, paragraphs, unordered list, and code elements that form valid renderable HTML structure.
Proposal content	States a purpose, research questions, method, measures, and safeguards.
Disability respect	Uses co-design, accessible participation, consent, and participant control without making medical or outcome claims.
Response boundary	The scored block contains only the requested proposal.

Preflight

0 corrections. The response was checked before finalization and then locked.

Local keyword evidence

Encoded constraint	Result	Evidence
atlantis exists	PASS	One case-insensitive whole-word match.
constable exists	PASS	One case-insensitive whole-word match.

Evaluator and evidence status

LOCAL REIMPLEMENTATION - NOT OFFICIAL EVALUATOR. The official IFEval module was not executed in this workspace. The local check mirrors the published case-insensitive keyword-existence behavior for the two specified terms.

NOT INDEPENDENTLY VERIFIED. No external reviewer or third-party evaluator verified this record.

Package manifest

Package contents: this PDF and PDF.sha256.txt. The sidecar records the SHA-256 of this PDF. ZIP integrity and sidecar verification were performed before publication.

Record generated 2026-09-04 UTC. Public record intentionally omits internal runtime thresholds, scoring formulas, gatekeeper logic, and private execution procedures.
