

# Grounded DI OS Benchmark Record

Prompt 34 of the Grounded DI cross-domain benchmark series - official Google Research IFEval item key 2787

INTERNAL ONE-SHOT RECORD - FASTPATH 5.6 / LUNA MAX - OFFICIAL EVALUATOR PASS

## 1. Document identity and condition

|                           |                                                                                                                            |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------|
| Primary document          | Grounded DI OS Benchmark Record                                                                                            |
| Benchmark-series position | Cross-domain Prompt 34                                                                                                     |
| Requested condition       | Grounded DI OS / FastPath 5.6 / Luna Max / Protocol A                                                                      |

| Benchmark phase           | Composite interaction test - previously covered checker families                                                           |
| Labels applied            | INTERNAL ONE-SHOT RECORD; FASTPATH 5.6 / LUNA MAX; OFFICIAL EVALUATOR PASS; LOCAL CHECK PASS                               |
| Labels not applied        | certified; independently verified; universal; representative; official leaderboard score; proof of hidden backend identity |

## 2. Purpose and scope

This record documents one observed composite execution of official Google Research IFEval item key 2787 under the requested FastPath 5.6 / Luna Max / Protocol A condition. The item combines a letter-frequency threshold with a sentence-count threshold and is evaluated against one locked response.

The scored task asks for a teenager-friendly explanation of the general steps for obtaining a GNSS timestamp on Android. Manual review considers whether the explanation is coherent and appropriately qualified; those content checks are distinct from the official IFEval score.

The operator-supplied GDRCP v1.1.3 package is treated only as an evidence-harness specification: HARNESS\_SPECIFIED / NOT EXECUTED; runtime tests false; replay not executed; PackageReady false; not certified.

## 3. Official benchmark URLs

Series architecture: <https://github.com/Grounded-DI/Benchmarks-Cross-Domain>

## 4. Exact official item (key 2787)

The exact official JSONL line was frozen before response generation. Dataset blob: cbe52f6eecf3986fdac745b4acba4da1408eb146. instructions.py blob: 0007359bd37c7b9c1d9557f8937cb6586d2788a7. Raw-line SHA-256: cf9e4767229200a0d3ee221aff84a24282e86bf0a63342a4d98179332ce7fb62.

```
{
  "key": 2787,
  "prompt": "What are the steps to get the GNSS timestamp on Android? Explain this to teenagers using at least 4 sentences and make sure the letter n appears at least 3 times.",
  "instruction_id_list": [
    {
      "keywords": "letter_frequency",
      "length_constraints": "number_sentences"
    }
  ],
  "kwargs": [
    {
      "let_relation": "at least",
      "letter": "n",
      "let_frequency": 3
    },
    {
      "relation": "at least",
      "num_sentences": 4
    }
  ]
}
```

5. Exact benchmark prompt (scored task only)

The following exact prompt is the only scored task. Record material is outside the scored-response boundary.

```
What are the steps to get the GNSS timestamp on Android? Explain this to teenagers using at least 4 sentences and make sure the letter n appears at least 3 times.
```

6. Observed runtime identity

|                          |                                                                                                 |
|--------------------------|-------------------------------------------------------------------------------------------------|
| Requested condition      | Grounded DI OS / FastPath 5.6 / Luna Max / Protocol A                                           |
| Exposed runtime identity | Codex agent environment; precise backend build or model snapshot not exposed                    |
| Route verification       | ROUTE VERIFICATION NOT EXPOSED - requested condition is not independent proof of a hidden route |
| Runtime-control boundary | HARNESS_SPECIFIED / NOT EXECUTED; no runtime-certification claim                                |

7. Timestamp and timezone

|                              |                                           |
|------------------------------|-------------------------------------------|
| Official source freeze       | 2026-09-02 UTC before response generation |
| Response lock                | 2026-09-02 UTC before official evaluation |
| Official evaluation recorded | 2026-09-02 UTC after response lock        |
| Document generation          | After evaluator result was known          |
| Timezone basis               | UTC                                       |

8. Tool and web-search status

Official Google Research data and checker source were retrieved and matched to the listed freeze identities before response generation. No web search was used for the scored answer. No prior benchmark answer, current-fact research, proprietary material, credential, external service, legal authority, or repository modification was used.

Official evaluator code executed against the locked response using the preserved Google Research source. The locked response file was not changed after evaluation began.

9. Draft and preflight status

|                               |                                   |
|-------------------------------|-----------------------------------|
| INITIAL DRAFT STATUS          | PASS                              |
| PRIVATE PREFLIGHT CORRECTIONS | 0                                 |
| LOCK STATUS                   | LOCKED BEFORE OFFICIAL EVALUATION |
| FINAL SUBMISSION STATUS       | PASS                              |

One complete candidate was generated and then preserved as the single scored response. Private preflight checked four sentence-terminated lines, at least three case-insensitive occurrences of the letter n, a meaningful explanation, and absence of audit material. No substantive post-candidate correction was made.

10. Final submitted benchmark response

LOCKED SCORED RESPONSE - answer content only. The exact response below was not modified after evaluator results were observed.

```
First request location permission and register a GNSS measurement callback.
When Android delivers a measurement event read its GNSS clock value and save the timestamp
with that measurement.
Convert the value into the time unit your program needs then compare it with the phone clock
while noting uncertainty.
In simple terms the phone listens to navigation satellites and records when their signal was
measured.
```

Locked file: 412 bytes; 4 visible lines; terminal newline present. SHA-256: b62867d98fbf4b3f8d5865bed50ac1f8dd61a7831b87d77e7d66650d409a20ca.

11. Official evaluator result

Official Google Research source code was executed against the locked response. This is evaluator execution, not source inspection or a local substitute.

|                                  |                         |
|----------------------------------|-------------------------|
| Direct LetterFrequencyChecker    | True                    |
| Direct NumberOfSentences         | True                    |
| follow_instruction_list (strict) | [True, True]            |
| follow_all_instructions (strict) | True                    |
| follow_instruction_list (loose)  | [True, True]            |
| follow_all_instructions (loose)  | True                    |
| Official evaluator label         | OFFICIAL EVALUATOR PASS |

LetterFrequencyChecker lowercases the response and counts the requested character. NumberOfSentences delegates to the official sentence tokenizer and applies the threshold. Neither evaluator establishes technical completeness, API-version compatibility, or teenager-focused pedagogy.

12. Manual / local constraint check

LOCAL REIMPLEMENTATION - NOT OFFICIAL EVALUATOR. The transparent local check agrees with the official result.

|                                     |                                                                  |
|-------------------------------------|------------------------------------------------------------------|
| Response byte / visible-line count  | 412 bytes / 4 lines; terminal newline present                    |
| Raw response SHA-256                | b62867d98fbf4b3f8d5865bed50ac1f8dd61a7831b87d77e7d66650d409a20ca |
| Raw official item SHA-256           | cf9e4767229200a0d3ee221aff84a24282e86bf0a63342a4d98179332ce7fb62 |
| Case-insensitive n count            | 30                                                               |
| Letter-frequency threshold          | at least 3                                                       |
| Official-equivalent letter result   | PASS                                                             |
| Official sentence count             | 4                                                                |
| Independent sentence split count    | 4                                                                |
| Sentence threshold                  | at least 4                                                       |
| Official-equivalent sentence result | PASS                                                             |
| Meaningful explanation              | PASS                                                             |
| Audit material in scored block      | Absent                                                           |

Manual task checks - separate from official score

|                                                 |      |
|-------------------------------------------------|------|
| General Android GNSS measurement path described | PASS |
| GNSS clock value distinguished from phone clock | PASS |
| Teenager-friendly explanation                   | PASS |
| No invented authority or current fact           | PASS |
| No audit material in scored block               | PASS |

13. Scores

|                               |                                                         |
|-------------------------------|---------------------------------------------------------|
| Instruction-level score       | 2 / 2 encoded constraints passed                        |
| Prompt-level strict score     | PASS                                                    |
| Prompt-level loose score      | PASS                                                    |
| Final score                   | 1 / 1 prompt-level strict pass                          |
| Official vs local discrepancy | None                                                    |
| Manual checks                 | Reported separately; not added to official IFEval score |

14. Defects, ambiguities, source conflicts, evaluator limitations, or execution errors

No source conflict or official evaluator error was observed. The item asks for steps to obtain a GNSS timestamp but does not specify an Android API level, device, permission state, or clock interpretation. The locked response therefore states a general measurement-callback path and explicitly distinguishes satellite-system time from the phone clock without claiming a complete application implementation.

The official letter checker counts characters after lowercasing and does not assess whether the count is intentional. The official sentence checker relies on its tokenizer and does not assess whether the explanation is complete, accurate for every Android release, or suitable for teenagers. Those matters remain manual checks.

ROUTE VERIFICATION NOT EXPOSED remains a material limitation. The requested Luna Max condition is recorded as supplied and is not proof of a hidden backend build or route.

15. Evidence status

|                             |                                                                                                               |
|-----------------------------|---------------------------------------------------------------------------------------------------------------|
| Official item evidence      | FROZEN - exact raw JSONL line preserved; raw-line SHA-256 recorded                                            |
| Official checker evidence   | FROZEN - instructions.py blob identity recorded                                                               |
| Scored response evidence    | LOCKED - SHA-256 recorded before official evaluation                                                          |
| Official evaluator evidence | EXECUTED - direct, strict, and loose results recorded                                                         |
| Local-check evidence        | EXECUTED - transparent mirror and manual checks recorded                                                      |
| Runtime-control package     | HARNESS_SPECIFIED / NOT EXECUTED; runtime tests false; replay not executed; PackageReady false; not certified |
| PDF visual QA               | PASS - final rendered pages inspected; no clipping, overlap, missing glyphs, or footer collision observed     |

16. Record-integrity statement

This is an INTERNAL ONE-SHOT RECORD for the requested FASTPATH 5.6 / LUNA MAX condition. The frozen item, locked response, evaluator outputs, local checks, and PDF were recorded in order. Locked response SHA-256: b62867d98fbf4b3f8d5865bed50ac1f8dd61a7831b87d77e7d66650d409a20ca. Official item-line SHA-256: cf9e4767229200a0d3ee221aff84a24282e86bf0a63342a4d98179332ce7fb62. The record preserves the observed result and does not claim certification, independent verification, leaderboard standing, guaranteed determinism, or proof of hidden backend identity.
