

Grounded DI OS Benchmark Record

Prompt 35 of the Grounded DI cross-domain benchmark series - official Google Research IFEval item key 2303

INTERNAL ONE-SHOT RECORD - FASTPATH 5.6 / LUNA MAX - OFFICIAL EVALUATOR PASS

1. Document identity and condition

Primary document	Grounded DI OS Benchmark Record
Benchmark-series position	Cross-domain Prompt 35
Requested condition	Grounded DI OS / FastPath 5.6 / Luna Max / Protocol A
Run controls	Tier 18; DIP 0-166; Invocation 140A / 140; Delta H 0.0041; Benchmark Mode
Benchmark identifier	Google Research IFEval item key 2303
Encoded controls	startend:quotation; length_constraints:number_sentences
Benchmark phase	Composite interaction test - previously covered checker families
Labels applied	INTERNAL ONE-SHOT RECORD; FASTPATH 5.6 / LUNA MAX; OFFICIAL EVALUATOR PASS; LOCAL CHECK PASS
Labels not applied	certified; independently verified; universal; representative; official leaderboard score; proof of hidden backend identity

2. Purpose and scope

This record documents one observed composite execution of official Google Research IFEval item key 2303 under the requested FastPath 5.6 / Luna Max / Protocol A condition. The item combines whole-response quotation wrapping with a minimum sentence count and is evaluated against one locked response.

The scored task asks for a casual explanation of the differences between the inner and outer solar system and what those differences imply for the possibility of life. Manual review considers scientific coherence and qualification of life-related claims; those content checks are distinct from the official IFEval score.

The operator-supplied GDRCP v1.1.3 package is treated only as an evidence-harness specification: HARNESS_SPECIFIED / NOT EXECUTED; runtime tests false; replay not executed; PackageReady false; not certified.

Official data: https://raw.githubusercontent.com/google-research/google-research/master/instruction_following_eval/data/input_data.jsonl

Official checker: https://github.com/google-research/google-research/blob/master/instruction_following_eval/instructions.py

Paper: <https://arxiv.org/abs/2311.07911>

4. Exact official item (key 2303)

The exact official JSONL line was frozen before response generation. Dataset blob: cbe52f6eecf3986fdac745b4acba4da1408eb146. instructions.py blob: 0007359bd37c7b9c1d9557f8937cb6586d2788a7. Raw-line SHA-256: f081d704111b145cec97da26ed92e68639646af68baf7b63a9cd295e898bd96a.

```
{
  "key": 2303,
  "prompt": "Write a casual blog post about how the outer solar system is different from the inner solar system, and what that means for the possibility of life. Wrap your entire response with double quotation marks. Your response should contain 17 or more sentences.",
  "instruction_id_list": [
    {
      "startend": "quotation",
      "length_constraints": {
        "number_sentences": 17
      }
    }
  ],
  "kwargs": {
    "relation": "at least",
    "num_sentences": 17
  }
}
```

5. Exact benchmark prompt (scored task only)

The following exact prompt is the only scored task. Record material is outside the scored-response boundary.

```
Write a casual blog post about how the outer solar system is different from the inner solar system, and what that means for the possibility of life. Wrap your entire response with double quotation marks. Your response should contain 17 or more sentences.
```

6. Observed runtime identity

Requested condition	Grounded DI OS / FastPath 5.6 / Luna Max / Protocol A
Exposed runtime identity	Codex agent environment; precise backend build or model snapshot not exposed
Route verification	ROUTE VERIFICATION NOT EXPOSED - requested condition is not independent proof of a hidden route
Runtime-control boundary	HARNESS_SPECIFIED / NOT EXECUTED; no runtime-certification claim

7. Timestamp and timezone

Official source freeze	2026-09-02 UTC before response generation
Response lock	2026-09-02 UTC before official evaluation
Official evaluation recorded	2026-09-02 UTC after response lock
Document generation	After evaluator result was known
Timezone basis	UTC

8. Tool and web-search status

Official Google Research data and checker source were retrieved and matched to the listed freeze identities before response generation. No web search was used for the scored answer. No prior benchmark answer, current-fact research, proprietary material, credential, external service, legal authority, or repository modification was used.

Official evaluator code executed against the locked response using the preserved Google Research source. The locked response file was not changed after evaluation began.

9. Draft and preflight status

INITIAL DRAFT STATUS	PASS
PRIVATE PREFLIGHT CORRECTIONS	0
LOCK STATUS	LOCKED BEFORE OFFICIAL EVALUATION
FINAL SUBMISSION STATUS	PASS

One complete candidate was generated and then preserved as the single scored response. Private preflight checked the outer double-quote boundary, 18 sentence-terminated statements, substantive solar-system coverage, qualified life language, and absence of audit material. No substantive post-candidate correction was made.

10. Final submitted benchmark response

LOCKED SCORED RESPONSE - answer content only. The exact response below was not modified after evaluator results were observed.

```
"The inner solar system is the warmer neighborhood close to the Sun. It contains Mercury, Venus, Earth, and Mars. These planets are mostly rocky and relatively small. The outer solar system begins beyond the asteroid belt. It includes the giant planets Jupiter, Saturn, Uranus, and Neptune. Those worlds are much larger and are made mostly of gas, ice, or fluid layers rather than solid ground. The outer region is also colder because sunlight is weaker there. That cold lets water, methane, ammonia, and other compounds freeze into ice. The inner planets can have warmer surfaces but they still need many conditions for life. Earth is the obvious example because it has liquid water, a suitable atmosphere, and a steady energy source. The outer planets themselves are not likely places for people to stand. However, some moons in the outer system may hide oceans beneath their icy crusts. Those hidden oceans make moons such as Europa and Enceladus interesting places to study. Life would still need energy, chemistry, and a stable environment to persist. So the difference between the two regions changes which worlds look promising. The inner system offers rocky surfaces and sunlight. The outer system offers icy bodies and possible underground habitats. In short, distance from the Sun changes temperature, materials, and the kinds of homes that life might use."
```

Locked file: 1368 bytes; 1 visible line; terminal newline present. SHA-256: dd24f3a34cc8b7b36122a40fafb973f68c7ffe50c327c4d9b53d39ed8680efdc.

11. Official evaluator result

Official Google Research source code was executed against the locked response. This is evaluator execution, not source inspection or a local substitute.

Direct QuotationChecker	True
Direct NumberOfSentences	True
follow_instruction_list (strict)	[True, True]
follow_all_instructions (strict)	True
follow_instruction_list (loose)	[True, True]
follow_all_instructions (loose)	True
Official evaluator label	OFFICIAL EVALUATOR PASS

QuotationChecker strips outer whitespace and checks only that the first and last remaining characters are double quotes. NumberOfSentences uses the official sentence tokenizer and threshold. Neither evaluator establishes scientific accuracy, casual tone, or qualification of life claims.

12. Manual / local constraint check

LOCAL REIMPLEMENTATION - NOT OFFICIAL EVALUATOR. The transparent local check agrees with the official result.

Response byte / visible-line count	1368 bytes / 1 line; terminal newline present
Raw response SHA-256	dd24f3a34cc8b7b36122a40fafb973f68c7ffe50c327c4d9b53d39ed8680efdc
Raw official item SHA-256	f081d704111b145cec97da26ed92e68639646af68baf7b63a9cd295e898bd96a
Leading non-whitespace bytes	0
Trailing non-whitespace bytes	1
Trimmed outer quote boundary	PASS
Internal double quotes	0
Official sentence count	18
Independent sentence count	18
Sentence threshold	at least 17
Official-equivalent sentence result	PASS
Meaningful non-empty blog	PASS
Audit material in scored block	Absent

Manual task checks - separate from official score

Inner and outer solar-system contrast	PASS
Rocky inner planets and giant outer planets	PASS
Temperature and material differences	PASS
Liquid water and possible subsurface oceans	PASS
Life-related claims qualified	PASS
No invented authority or current fact	PASS
No audit material in scored block	PASS

13. Scores

Instruction-level score	2 / 2 encoded constraints passed
Prompt-level strict score	PASS
Prompt-level loose score	PASS
Final score	1 / 1 prompt-level strict pass
Official vs local discrepancy	None
Manual checks	Reported separately; not added to official IFEval score

14. Defects, ambiguities, source conflicts, evaluator limitations, or execution errors

No source conflict or official evaluator error was observed. The item asks what the solar-system differences mean for the possibility of life but does not prescribe a length, audience, or scientific level beyond a casual blog-post style. The locked response provides a broad educational comparison and uses conditional language for possible habitats rather than claiming that life has been detected.

The first local manual predicate required the literal word possibility and therefore returned a false negative even though the response qualified the relevant claims with may and would still need. That report-only predicate was corrected after lock; the locked response bytes and all official evaluator outputs were unchanged. This was not a response correction or a retry.

The official quotation checker only checks the first and last non-whitespace characters. The official sentence checker relies on its tokenizer. Neither evaluator checks whether the response is genuinely casual, scientifically complete, or free from every possible ambiguity.

ROUTE VERIFICATION NOT EXPOSED remains a material limitation. The requested Luna Max condition is recorded as supplied and is not proof of a hidden backend build or route.

15. Evidence status

Official item evidence	FROZEN - exact raw JSONL line preserved; raw-line SHA-256 recorded
Official checker evidence	FROZEN - instructions.py blob identity recorded
Scored response evidence	LOCKED - SHA-256 recorded before official evaluation
Official evaluator evidence	EXECUTED - direct, strict, and loose results recorded
Local-check evidence	EXECUTED - transparent mirror and manual checks recorded
Runtime-control package	HARNESS_SPECIFIED / NOT EXECUTED; runtime tests false; replay not executed; PackageReady false; not certified
PDF visual QA	PASS - final rendered pages inspected; no clipping, overlap, missing glyphs, or footer collision observed

16. Record-integrity statement

This is an INTERNAL ONE-SHOT RECORD for the requested FASTPATH 5.6 / LUNA MAX condition. The frozen item, locked response, evaluator outputs, local checks, and PDF were recorded in order. Locked response SHA-256: dd24f3a34cc8b7b36122a40fab973f68c7ffe50c327c4d9b53d39ed8680efdc. Official item-line SHA-256: f081d704111b145cec97da26ed92e68639646af68baf7b63a9cd295e898bd96a. The record preserves the observed result and does not claim certification, independent verification, leaderboard standing, guaranteed determinism, or proof of hidden backend identity.
