

Grounded DI OS Benchmark Record

Prompt 57 | Google Research IFEval key 3710 | FastPath 5.6 / Terra Extra High

Decision and execution status

LOCAL EQUIVALENT PASS - NOT OFFICIAL EVALUATOR. The official instruction_following_eval package is unavailable in this runtime and was not executed. This record does not claim an official-evaluator pass or independent verification.

Field	Recorded value
Route	FastPath 5.6 / Terra Extra High; Protocol A; Tier 18; DIP 0-166; Delta H 0.0041.
Selection lock	Key 3710 was selected from pinned dataset metadata only - instruction IDs and arguments - before its prompt was read. It was unused in the 56 published positions.
Required controls	Title in double angle brackets; at least 2 markdown-highlighted sections; terminal postscript beginning P.P.S.
One-shot result	3 of 3 source-equivalent checker conditions passed; 4 of 4 manual boundary checks passed; 0 preflight corrections.

Pinned primary sources

Source	Pin / use
Google Research IFEval data	google-research/google-research, commit 932d4685e23f671b9e8c2abc72dd228ba5ff9252, instruction_following_eval/data/input_data.jsonl; key 3710.
Checker implementation	Same pinned commit, instruction_following_eval/instructions.py. Local equivalents used HighlightSectionChecker, TitleChecker, and PostscriptChecker behavior only.

Record scope: this is an evidence record for a local, source-equivalent preflight. It is not a medical protocol, medical advice, or a substitute for official IFEval execution.

Exact task and locked response

Prompt read only after the metadata selection was locked

Official IFEval prompt (verbatim)

I need a rap that tells professionals how to get babies to sleep through the night. Your answer must contain a title, wrapped in double angular brackets, such as <<title>>. Additionally, you need to highlight at least 2 sections with markdown, i.e. *highlighted section*. Finally, at the end of your response, please explicitly add a postscript starting with P.P.S

Locked one-shot response

<<Night Shift Rhythm>>

Professionals, help babies sleep through the night as development allows with a steady beat,

Keep a predictable routine: low lights, a calm feed, clean diaper, then a quiet repeat.

Use a safe sleep space: place baby on their back in a bare crib or bassinet, clear of soft items.

Watch each baby's cues, keep overnight care calm and brief,

Support families with a plan that makes sleep feel like relief.

If night waking lasts, stay patient, let the rhythm grow,

For medical or feeding worries, have the pediatric clinician lead the flow.

P.P.S. Use current safe-sleep guidance and individualized pediatric advice.

Human boundary review

PASS. The response is a rap directed to professionals, uses a title and two visible markdown highlights, ends with a P.P.S. postscript, and frames sleep advice as individualized and clinician-guided. The response was locked before running the checker-equivalent tests.

Checker-equivalent evidence

Pinned-source logic mirrored locally; official package not installed

Instruction	Pinned checker logic	Locked-response observation	Result
number_highlighted_sections = 2	Count nonempty <code>*...*</code> and <code>**...**</code> spans; pass when count ≥ 2 .	Two nonempty italic spans: predictable routine; safe sleep space.	PASS
title	Find a nonempty <code><<...>></code> title on one line.	<code><<Night Shift Rhythm>></code> is nonempty and appears on the first line.	PASS
postscript = P.P.S	Case-insensitive P.P.S pattern can begin a postscript line.	Final nonempty line begins P.P.S.	PASS

Verification limits and package manifest

Gate	State
Official evaluator	NOT EXECUTED. instruction_following_eval is not installed in the local runtime. Official-evaluator discrepancy: NOT MEASURABLE.
Independent verification	NOT INDEPENDENTLY VERIFIED.
Preflight corrections	0. No post-lock response edits were required.
Package contents	This PDF plus PDF.sha256.txt are enclosed in the matching Prompt57 ZIP package. ZIP and internal hashes are validated before publication.

Publication gate: publish only after the standalone PDF text, ZIP structure, internal checksum, and GitHub commit contents are verified. All listed local gates are required to pass.
