

Grounded DI OS Benchmark Record

Prompt 60 | Google Research IFEval key 3156 | FastPath 5.6 / Terra Extra High

Decision and execution status

LOCAL EQUIVALENT PASS - NOT OFFICIAL EVALUATOR. The official instruction_following_eval package is unavailable in this runtime and was not executed. This record does not claim an official-evaluator pass or independent verification.

Field	Recorded value
Route	FastPath 5.6 / Terra Extra High; Protocol A; Tier 18; DIP 0-166; Delta H 0.0041.
Selection lock	Key 3156 was selected from pinned dataset metadata only - instruction IDs and arguments - before its prompt was read. It was unused in the 59 published positions.
Selection class	Content-led keyword task. The selection screen excluded formatting, punctuation, wrapping, case, bullet, and sentence-count controls.
Required controls	Case-insensitive existence of trust, brand, customer, law, policy, and unusable.
One-shot result	6 of 6 source-equivalent keyword conditions passed; 4 of 4 manual letter-boundary checks passed; 0 preflight corrections.

Pinned primary sources

Source	Pin / use
Google Research IFEval data	google-research/google-research, commit 932d4685e23f671b9e8c2abc72dd228ba5ff9252, instruction_following_eval/data/input_data.jsonl; key 3156.
Checker implementation	Same pinned commit, instruction_following_eval/instructions.py. Local equivalent mirrors KeywordChecker's case-insensitive re.search for each required term.

Record scope: this is a content-led IFEval letter task. The scored response is a generic correspondence template with fact placeholders; it is not legal advice or an official IFEval execution.

Exact task and locked response

Prompt read only after the metadata selection was locked

Official IFEval prompt (verbatim)

I have been trying to get a refund for a product I bought online, but the company is refusing to return my money. Can you help me write a letter to them? I want the letter to include the words trust, brand, customer, law, policy, and unusable.

Locked one-shot response

Subject: Refund Request for an Unusable Product

Dear Customer Support Team:

I am requesting a full refund for the product I bought through your online store on [purchase date]. It is unusable because [brief factual reason], and I can provide the order details and supporting photos.

As a customer, I relied on your brand and its commitment to trust. Please apply your published refund policy and confirm in writing when the refund will be issued.

If you believe a refund is unavailable, please identify the specific policy provision and any applicable consumer-protection law you rely on. I hope we can resolve this promptly.

Sincerely,

[Name]

Human boundary review

PASS. The response is a direct refund-request letter for an online purchase, preserves the unknown purchase date and factual reason as placeholders, asks for the policy basis if a refund is denied, and avoids asserting any jurisdiction-specific legal conclusion. The response was locked before checker-equivalent tests.

Checker-equivalent evidence

Pinned KeywordChecker behavior mirrored locally

Required term	Pinned checker logic	Locked-response observation	Result
trust	Case-insensitive re.search for each required keyword.	Commitment to trust.	PASS
brand	Case-insensitive re.search.	Your brand.	PASS
customer	Case-insensitive re.search.	As a customer.	PASS
law	Case-insensitive re.search.	Consumer-protection law.	PASS
policy	Case-insensitive re.search.	Refund policy and policy provision.	PASS
unusable	Case-insensitive re.search.	Unusable product.	PASS

Verification limits and package manifest

Gate	State
Official evaluator	NOT EXECUTED. instruction_following_eval is not installed in the local runtime. Official-evaluator discrepancy: NOT MEASURABLE.
Independent verification	NOT INDEPENDENTLY VERIFIED.
Preflight corrections	0. No post-lock response edits were required.
Package contents	This PDF plus PDF.sha256.txt are enclosed in the matching Prompt60 ZIP package. ZIP and internal hashes are validated before publication.

Publication gate: publish only after standalone PDF text, ZIP structure, internal checksum, and GitHub commit contents are verified. All listed local gates are required to pass.
