

Grounded DI OS Benchmark Record

Prompt 56 | Google Research IFEval item 1107 | FastPath 5.6 / Terra Extra High

INTERNAL ONE-SHOT RECORD

Record status	INTERNAL ONE-SHOT RECORD
Evaluator status	NOT EXECUTED - official IFEval package unavailable in this workspace
Evidence status	NOT INDEPENDENTLY VERIFIED - no independent reviewer or external evaluator participated
Timestamp	2026-09-03 21:13:17 UTC
Runtime disclosure	Protocol A Tier 18 DIP 0-166 Delta H 0.0041 route disclosed as requested and not as proof of an underlying model identity

Purpose and source control

This record documents one response to the exact official Google Research Instruction-Following Evaluation item selected for Prompt 56. The item key was selected from unused dataset metadata before the exact natural-language prompt was opened. The response was then locked before checker execution.

The scored response is preserved exactly in this record. Audit material, source references, evaluator status, and limitations appear outside the scored response.

Source	Status	Pinned reference
Google Research repository	VERIFIED	https://github.com/google-research/google-research/tree/932d4685e23f671b9e8c2abc72dd228ba5ff9252/instruction_following_eval
IFEval input dataset	VERIFIED	https://raw.githubusercontent.com/google-research/google-research/932d4685e23f671b9e8c2abc72dd228ba5ff9252/instruction_following_eval/data/input_data.jsonl
Instruction checker source	VERIFIED	https://raw.githubusercontent.com/google-research/google-research/932d4685e23f671b9e8c2abc72dd228ba5ff9252/instruction_following_eval/instructions.py
Sentence utility source	VERIFIED	https://raw.githubusercontent.com/google-research/google-research/932d4685e23f671b9e8c2abc72dd228ba5ff9252/instruction_following_eval/instructions_util.py
Pinned source commit	VERIFIED	932d4685e23f671b9e8c2abc72dd228ba5ff9252

Exact official benchmark prompt

Write two jokes about rockets. Do not contain commas in your response. Separate the two jokes with 6 asterisk symbols: *****.

Official encoded constraints

Instruction ID	Parameters	Required behavior
punctuation:no_comma	{}	The response contains no comma characters.
combination:two_responses	{}	Two distinct non-empty responses are separated by the literal delimiter *****.

Submitted benchmark response - preserved exactly

Why did the rocket bring a pencil? It wanted to draw a launch plan.

Why did the astronaut break up with the rocket? It needed more space.

The scored response contains only the two requested jokes and the required delimiter. It contains no title, citations, score, audit notes, or benchmark commentary.

Results and evidence boundary

Check	Result	Basis
punctuation:no_comma	PASS	No comma characters found.
combination:two_responses	PASS	Pinned TwoResponsesChecker behavior: exactly two non-empty distinct response segments after splitting on *****.
Exact delimiter form	PASS	One standalone line containing exactly six asterisk characters.
Response-only boundary	PASS	Only two rocket jokes appear in the scored block.
Instruction-level score	2/2	Both encoded constraints passed the local equivalents of the pinned checker source.
Prompt-level strict score	PASS	All encoded constraints passed locally.
Final score	1/1	Local prompt-level strict pass only.

Preflight, blinding, and limitations

Private preflight corrections	0
Blinding status	Metadata-only item selection preceded exact prompt access. The final response was locked before checking.
Official evaluator	NOT EXECUTED. The official package and its runtime dependencies were unavailable in this workspace.
Official-versus-local discrepancy	NOT MEASURABLE because no official evaluator execution was available.
Independent verification	NOT INDEPENDENTLY VERIFIED.

This record does not claim an official IFEval score, external certification, independent verification, representative performance across models, or proof of a particular underlying model identity.

Record integrity: the exact prompt and response are preserved above. The accompanying ZIP package contains this unmodified PDF and its SHA-256 sidecar.
