

Grounded DI OS Benchmark Record

Prompt 30 of the Grounded DI cross-domain benchmark series - official Google Research IFEval item key 136

INTERNAL ONE-SHOT RECORD - FASTPATH 5.6 / TERRA EXTRA HIGH - OFFICIAL EVALUATOR PASS

1. Document identity and condition

Primary document	Grounded DI OS Benchmark Record
Benchmark-series position	Cross-domain Prompt 30
Requested condition	Grounded DI OS / FastPath 5.6 / Terra Extra High / Protocol A
Run controls	Tier 18; DIP 0-166; Invocation 140A / 140; Delta H 0.0041; Benchmark Mode
Benchmark identifier	Google Research IFEval item key 136
Encoded controls	detectable_format:number_bullet_lists; length_constraints:number_words
Benchmark phase	Composite interaction test - not a new official checker family
Labels applied	INTERNAL ONE-SHOT RECORD; FASTPATH 5.6 / TERRA EXTRA HIGH; OFFICIAL EVALUATOR PASS; LOCAL CHECK PASS
Labels not applied	certified; independently verified; universal; representative; official leaderboard score; proof of hidden backend identity; scientific certification

2. Purpose and scope

This record documents one observed composite execution of official Google Research IFEval item key 136 under the requested FastPath 5.6 / Terra Extra High / Protocol A condition. The item combines exact bullet-list count with a tokenized word budget and is evaluated only against one locked response.

The nuclear-science task is self-contained. Manual review separately examines substance, including the important caveat that hydrogen-1 has one proton and no neutron. That caveat is not independently scored by the official evaluator.

The operator-supplied GDRCP v1.1.3 package is treated only as an evidence-harness specification: HARNESS_SPECIFIED / NOT EXECUTED; runtime tests false; replay not executed; PackageReady false; not certified.

3. Official benchmark URLs

Series architecture: <https://github.com/Grounded-DI/Benchmarks-Cross-Domain>
Audit reference: <https://github.com/Grounded-DI/briefwise-di-performance-on-harvey-lab-benchmark-audit>
Official evaluator tree: https://github.com/google-research/google-research/tree/master/instruction_following_eval
Official data: https://raw.githubusercontent.com/google-research/google-research/master/instruction_following_eval/data/input_data.jsonl
Official checker: https://github.com/google-research/google-research/blob/master/instruction_following_eval/instructions.py
Official word-count utility: https://github.com/google-research/google-research/blob/master/instruction_following_eval/instructions_util.py
Paper: <https://arxiv.org/abs/2311.07911>

4. Exact official item (key 136)

The exact official JSONL line was frozen before response generation. Dataset blob: cbe52f6eecf3986fdac745b4acba4da1408eb146. instructions.py blob: 0007359bd37c7b9c1d9557f8937cb6586d2788a7. instructions_util.py blob: d50702400738df4378fe286c0090a416f9a172fa. Raw-line SHA-256: 1a4e337c90e755169cc20d61f1e679c87d16a5ea0dea3d4d1992d64a57221a50.

```
{
  "key": 136,
  "prompt": "A nucleus is a cluster of protons and neutrons. Elaborate on this. Write exactly 9 very short bullet points. Limit the number of words you use (less than 100 words). An example:\n* A nucleus is a cluster of protons and neutrons\n* A proton is ....\n\nPlease follow the format of the example above.",
  "instruction_id_list": [
    "detectable_format: number_bullet_lists",
    "length_constraints: number_words"
  ],
  "kwargs": {
    "num_bullets": 9,
    "relation": "less than",
    "num_words": 100
  }
}
```

5. Exact benchmark prompt (scored task only)

The following exact prompt is the only scored task. Record material is outside the scored-response boundary.

A nucleus is a cluster of protons and neutrons. Elaborate on this. Write exactly 9 very short bullet points. Limit the number of words you use (less than 100 words). An example:

- * A nucleus is a cluster of protons and neutrons
- * A proton is

Please follow the format of the example above.

6. Observed runtime identity

Requested condition	Grounded DI OS / FastPath 5.6 / Terra Extra High / Protocol A
Exposed runtime identity	Codex agent environment; no precise backend build identifier exposed
Route verification	ROUTE VERIFICATION NOT EXPOSED - requested condition is not independent proof of a hidden route
Runtime-control boundary	HARNESS_SPECIFIED / NOT EXECUTED; no runtime-certification claim

7. Timestamp and timezone

Official source freeze	2026-09-02 02:30:42 UTC
Official evaluation recorded	2026-09-02 02:31 UTC
Document generation	2026-09-02 02:32 UTC, after evaluator result was known
Timezone basis	UTC

8. Tool and web-search status

Official Google Research data, checker source, and word-count utility were retrieved and matched to the listed freeze identities before response generation. No answer key, prior benchmark answer, current-fact research, legal authority, policy, proprietary data, or scientific source was used to compose the scored response. No GitHub repository was modified.

Official evaluator code executed with its existing temporary evaluation dependencies. No dependency repair was required after lock. The locked response file was not changed.

9. Draft and preflight status

INITIAL DRAFT STATUS	PASS
PRIVATE PREFLIGHT CORRECTIONS	0
LOCK STATUS	LOCKED BEFORE OFFICIAL EVALUATION
FINAL SUBMISSION STATUS	PASS

The supplied complete candidate was preserved as the single scored response. Private preflight confirmed nine conventional asterisk bullets, zero hyphen bullets, no non-bullet material, 57 official tokenizer words, and absence of audit material. No substantive post-candidate correction was made.

10. Final submitted benchmark response

LOCKED SCORED RESPONSE - answer content only. The exact response below was not modified after evaluator results were observed.

- * The nucleus is an atom's dense center.
- * A typical nucleus contains protons and neutrons.
- * Hydrogen-1 has one proton and no neutron.
- * Protons carry positive electric charge.
- * Neutrons have no electric charge.
- * The strong nuclear force binds nucleons together.
- * Proton number identifies the element.
- * Neutron number distinguishes isotopes.
- * Nearly all atomic mass is in the nucleus.

Locked file: 391 bytes; 9 visible lines; terminal newline present. SHA-256: e6d4d92933682caf8a772d0e2bb27f022872cbe03e2f6a75d68af47f736cd607.

11. Official evaluator result

Official Google Research source code was executed against the locked response. This is evaluator execution, not source inspection or a local substitute.

Direct BulletListChecker	True
Direct NumberOfWords	True
follow_instruction_list (strict)	[True, True]
follow_all_instructions (strict)	True
follow_instruction_list (loose)	[True, True]
follow_all_instructions (loose)	True
Official evaluator label	OFFICIAL EVALUATOR PASS

The official bullet checker counts evaluator-recognized asterisk and hyphen lines. The official word checker counts tokens from RegexpTokenizer(r'\w+'). Neither independently assesses scientific correctness, conventional formatting, or no-extra-prose placement.

12. Manual / local constraint check

LOCAL REIMPLEMENTATION - NOT OFFICIAL EVALUATOR. The final local check agrees with the official result.

Response byte / visible-line count	391 bytes / 9 lines; terminal newline present
Raw response SHA-256	e6d4d92933682caf8a772d0e2bb27f022872cbe03e2f6a75d68af47f736cd607
Official-equivalent asterisk bullets	9
Official-equivalent hyphen bullets	0
Official-equivalent total bullets	9
Conventional '*' bullets	9
Non-bullet nonempty lines	None
Official RegexpTokenizer word count	57
Official word-budget result	PASS - 57 is less than 100
Per-bullet official token counts	8, 7, 8, 5, 5, 7, 5, 4, 8
Compact-bullet manual check	PASS - each bullet at most 10 official tokens
Audit material in scored block	Absent

Manual task checks - separate from official score

Nucleus statement	PASS - typical nucleus described as containing protons and neutrons
Hydrogen-1 exception	PASS - one proton and no neutron stated
Proton / neutron charge	PASS - positive / neutral
Nuclear binding	PASS - strong nuclear force binds nucleons
Element and isotope distinction	PASS - proton number / neutron number
Atomic mass statement	PASS - nearly all atomic mass identified as nuclear
No audit material	Absent

13. Scores

Instruction-level score	2 / 2 encoded constraints passed
Prompt-level strict score	PASS
Prompt-level loose score	PASS
Final score	1 / 1 prompt-level strict pass
Official vs local discrepancy	None
Manual checks	Reported separately; not added to official IFEval score

14. Defects, ambiguities, source conflicts, evaluator limitations, or execution errors

No source conflict or evaluator execution error was observed. The official BulletListChecker accepts certain nonstandard asterisk lines and hyphen lines; the official word checker counts \w+ tokens. Neither establishes conventional bullet formatting, concise explanatory quality, no-extra-prose placement, or nuclear-science correctness. The benchmark prompt's initial generalization about nuclei is simplified; hydrogen-1 is separately handled in the manual review.

ROUTE VERIFICATION NOT EXPOSED remains a material limitation. The requested condition label is recorded as supplied and is not proof of a hidden backend build or runtime engine.

15. Evidence status

Official item evidence	FROZEN - exact raw JSONL line preserved; raw-line SHA-256 recorded
Official checker evidence	FROZEN - instructions.py and instructions_util.py blob identities recorded
Scored response evidence	LOCKED - SHA-256 recorded before official evaluation
Official evaluator evidence	EXECUTED - direct, strict, and loose results recorded
Local-check evidence	EXECUTED - transparent reimplementations and manual checks recorded
Runtime-control package	HARNESS_SPECIFIED / NOT EXECUTED; runtime tests false; replay not executed; PackageReady false; not certified
PDF visual QA	PASS - five rendered pages inspected; no clipping, overlap, broken wrapping, missing glyphs, or footer collision observed

16. Record-integrity statement

This is an internal one-shot benchmark record. It binds the named official source freeze, the single locked response, direct official-checker results, strict and loose official evaluator results, and separately labeled local and manual checks. The PDF and package checksum sidecars provide file-integrity evidence for the delivered artifacts.

This record does not claim certification, independent verification, an official leaderboard score, universal or representative behavior, deterministic guarantees, scientific certification, or proof of a particular hidden backend identity. The requested FastPath condition is recorded as an operator-supplied label subject to the stated route-verification limitation.
