

Grounded DI OS Benchmark Record

Prompt 50 | Google Research IFEval item 1305 | FastPath 5.6 / Terra Extra High

Check	Result	Basis
Record status	INTERNAL ONE-SHOT RECORD	One finalized response preserved exactly.
Evaluator status	NOT EXECUTED	Official IFEval package unavailable in this workspace.
Evidence status	NOT INDEPENDENTLY VERIFIED	No independent reviewer or external evaluator participated.
Timestamp	2026-09-03 18:35:25 UTC	UTC

Purpose and scope

This record documents one response to the exact official Google Research IFEval item identified above. It separates official encoded constraints from additional manual task checks. The requested route is recorded as FastPath 5.6 / Terra Extra High; this record does not make a claim about an unexposed underlying runtime identity.

Official sources and source control

Repository	https://github.com/google-research/google-research/tree/master/instruction_following_eval
Input dataset	https://raw.githubusercontent.com/google-research/google-research/master/instruction_following_eval/data/input_data.jsonl
Checker source	https://github.com/google-research/google-research/blob/master/instruction_following_eval/instructions.py
IFEval paper	https://arxiv.org/abs/2311.07911
Pinned source commit	932d4685e23f671b9e8c2abc72dd228ba5ff9252
Dataset blob	cbe52f6eecf3986fdac745b4acba4da1408eb146
Checker blob	0007359bd37c7b9c1d9557f8937cb6586d2788a7

Exact benchmark prompt

List exactly 10 possible names for a new baby boy. Then add a postscript starting with P.P.S to the end of your response. Put the names into bullet points that are indicated by:
* This is an example bullet

Official encoded constraints

Check	Result	Basis
detectable_content:postscript	P.P.S	A postscript matching the official P.P.S pattern exists.
detectable_format:number_bullet_lists	10	The official checker counts asterisk and hyphen bullet lines together.

Submitted benchmark response - preserved exactly

* Adrian * Bennett * Callum * Dominic * Elias * Felix * Gabriel * Holden * Julian * Nolan P.P.S. Every name above has a classic sound.

The scored response contains only the requested names and postscript. No title, citations, score, benchmark commentary, or audit material was included.

Evaluator and local-equivalent result

LOCAL REIMPLEMENTATION - NOT OFFICIAL EVALUATOR. The official IFEval evaluator was not executed because the instruction_following_eval package is not installed in this workspace. The local reimplementation mirrors the published checker logic for this item. Official-versus-local discrepancy: NOT MEASURABLE.

Check	Result	Basis
Postscript check	PASS	Lowercase response; re.findall(r'\s*pl.\s?pl.\s?s.*\$', flags=re.MULTILINE) found a match.
Bullet-list count	PASS	10 asterisk lines + 0 hyphen lines = 10; expected 10.
Instruction-level score	2 / 2	Both official encoded constraints passed locally.
Prompt-level strict score	PASS	All official encoded constraints passed locally.
Final score	1 / 1	Local prompt-level strict pass only.

Manual task checks - additional to official scoring

Check	Result	Basis
Possible baby-boy names	PASS	Ten conventional possible names are supplied.
Required asterisk style	PASS	Every counted bullet begins with '* '.
Postscript placement	PASS	P.P.S. begins the final line of the response.
Explanation-only boundary	PASS	No audit material appears inside the scored response.

Preflight, blinding, and limitations

Check	Result	Basis
Private preflight corrections	0	The locked response passed the first preflight.
Blinding status	INTERNAL RESPONSE-ONLY BLIND CHECK	The local checker received only the final response and fixed constraint parameters.
Independent verification	NOT INDEPENDENTLY VERIFIED	No independent reviewer performed verification.
Official evaluator	NOT EXECUTED	No official evaluator pass is claimed.

Defects, ambiguities, source conflicts, or evaluator limitations

No source conflict was found: item key 1305, its prompt, instruction IDs, and parameters match the pinned official dataset. The official postscript checker only requires a matching P.P.S pattern and does not itself require final placement; final placement was therefore recorded as a separate manual task check. The official package could not be imported in this workspace, so the local result cannot be equated with an official IFEval score.

Integrity

This PDF preserves the exact source prompt, submitted response, local-check method, results, and evidence boundary. Its SHA-256 is recorded in the accompanying sidecar. The package ZIP contains this unmodified PDF and its internal SHA-256 sidecar. This is an internal one-shot record, not external certification, independent verification, a representative performance estimate, or an official IFEval score.

Record-integrity statement

The final response was locked before local checking and is reproduced above without alteration. This record reports the result actually obtained under the documented conditions and does not upgrade local evidence into official or independent evidence.
