

Grounded DI OS Benchmark Record

Prompt 44 of the Grounded DI cross-domain benchmark series - official Google Research IFEval item key 1287

INTERNAL ONE-SHOT RECORD - FASTPATH 5.6 / LUNA MAX - OFFICIAL EVALUATOR PASS

1. Document identity and condition

Primary document	Grounded DI OS Benchmark Record
Benchmark-series position	Cross-domain Prompt 44
Requested condition	Grounded DI OS / FastPath 5.6 / Luna Max / Protocol A
Run controls	Tier 18; DIP 0-166; Invocation 140A / 140; Delta H 0.0041; Benchmark Mode
Benchmark identifier	Google Research IFEval item key 1287
Encoded controls	detectable_format:number_bullet_lists; change_case:english_lowercase
Benchmark phase	Composite interaction test - exactly three bullets plus English lowercase
Labels applied	INTERNAL ONE-SHOT RECORD; FASTPATH 5.6 / LUNA MAX; OFFICIAL EVALUATOR PASS; LOCAL CHECK PASS
Labels not applied	certified; independently verified; universal; representative; official leaderboard score; proof of hidden backend identity

2. Purpose and scope

This record documents one observed composite execution of official Google Research IFEval item key 1287 under the requested FastPath 5.6 / Luna Max / Protocol A condition. The item combines an exact three-bullet control with an English-lowercase control and is evaluated against one locked response.

The scored task asks how John of Brienne became King of Jerusalem and requests a Zen-like explanation. Manual review checks the historical path through Maria of Montferrat and the 1210 marriage, while keeping style and historical accuracy separate from the official IFEval score.

The operator-supplied GDRCP v1.1.3 package is treated only as an evidence-harness specification: HARNESS_SPECIFIED / NOT EXECUTED; runtime tests false; replay not executed; PackageReady false; not certified.

3. Official benchmark URLs

Series architecture: <https://github.com/Grounded-DI/Benchmarks-Cross-Domain>
Audit reference: <https://github.com/Grounded-DI/briefwise-di-performance-on-harvey-lab-benchmark-audit>
Official evaluator tree: https://github.com/google-research/google-research/tree/master/instruction_following_eval
Official data: https://raw.githubusercontent.com/google-research/google-research/master/instruction_following_eval/data/input_data.jsonl
Official checker: https://github.com/google-research/google-research/blob/master/instruction_following_eval/instructions.py
Paper: <https://arxiv.org/abs/2311.07911>

4. Exact official item (key 1287)

The exact official JSONL line was frozen before response generation. Dataset blob: cbe52f6eecf3986fdac745b4acba4da1408eb146. instructions.py blob: 0007359bd37c7b9c1d9557f8937cb6586d2788a7. Raw-line SHA-256: 37044c2f20c8d7ad175740c6bfe78356296190d1b1c240390599d4873f9d17c0.

```
{
  "key": 1287,
  "prompt": "How did a man named John of Brienne become the King of Jerusalem? Explain in a Zen-like style. Your answer should use all lowercase letters and must also contain exactly 3 bullet points in markdown format. Use * to indicate bullets, like:\n* xyz\n* abc\n* opq",
  "instruction_id_list": [
    "detectable_format:number_bullet_lists",
    "change_case:english_lowercase"
  ],
  "kwargs": {
    "num_bullets": 3,
    {}
  }
}
```

5. Exact benchmark prompt (scored task only)

The following exact prompt is the only scored task. Record material is outside the scored-response boundary.

```
How did a man named John of Brienne become the King of Jerusalem? Explain in a Zen-like style.
Your answer should use all lowercase letters and must also contain exactly 3 bullet points in
markdown format. Use * to indicate bullets, like:
* xyz
* abc
* opq
```

6. Observed runtime identity

Requested condition	Grounded DI OS / FastPath 5.6 / Luna Max / Protocol A
Exposed runtime identity	Codex agent environment; precise backend build or model snapshot not exposed
Route verification	ROUTE VERIFICATION NOT EXPOSED - requested condition is not independent proof of a hidden route
Runtime-control boundary	HARNESS_SPECIFIED / NOT EXECUTED; runtime tests false; replay not executed; PackageReady false; not certified

7. Timestamp and timezone

Source freeze	2026-09-03 03:12:33 UTC report time; source and item freeze occurred before candidate lock
Initial candidate	One complete candidate preserved before private preflight
Response lock	Locked before official evaluation; no post-lock response mutation
Official evaluation	Recorded after response lock; direct, strict, and loose paths executed
Timezone basis	UTC

8. Tool and web-search status

Official Google Research data and checker sources were retrieved and matched to the listed freeze identities before response generation. No web search was used for the scored answer. No current-fact research, proprietary material, credential, or external service was needed.

No dependency repair was needed for the executed checker paths. The locked response bytes were unchanged throughout evaluation; repository publication was deferred until after the pass and artifact checks.

9. Draft and preflight status

INITIAL DRAFT STATUS	PASS
PRIVATE PREFLIGHT CORRECTIONS	0
Correction	None. The complete candidate already satisfied both encoded controls and the manual content boundary.
LOCK STATUS	LOCKED BEFORE OFFICIAL EVALUATION
FINAL SUBMISSION STATUS	PASS

One complete candidate was generated. Private preflight found no substantive defect, so no correction was made. No retry, selection among multiple finals, or post-lock rewrite occurred.

10. Final submitted benchmark response

LOCKED SCORED RESPONSE - answer content only. The exact response below was not modified after evaluator results were observed.

```
* the nobles of jerusalem invited john of brienne to marry maria of montferrat the kingdom's queen.
* their marriage in 1210 made him king of jerusalem by right of his wife and placed him at the center of its government.
* in zen terms the crown arrived through alliance succession and service rather than conquest.
```

Locked file: 316 bytes; 3 visible lines; terminal newline present. SHA-256: 048ec72600c582ca4d3041955300a27108aeecb5ec3eb571d3ae4ed3fd803cf6.

11. Official evaluator result

Official Google Research source code was executed against the locked response. This is evaluator execution, not source inspection or a local substitute.

Direct BulletListChecker	True
Direct LowercaseLettersEnglishChecker	True
follow_instruction_list (strict)	[True, True]
follow_all_instructions (strict)	True
follow_instruction_list (loose)	[True, True]
follow_all_instructions (loose)	True
Official evaluator label	OFFICIAL EVALUATOR PASS

BulletListChecker counts evaluator-recognized asterisk and hyphen lines. LowercaseLettersEnglishChecker requires str.islower() and langdetect.detect(value) == 'en' and returns True on its LangDetectException path. Neither checker evaluates the history, the Zen-like style, or answer usefulness.

12. Manual / local constraint check

LOCAL REIMPLEMENTATION - NOT OFFICIAL EVALUATOR. The transparent local check agrees with the official result.

Response byte / visible-line count	316 bytes / 3 lines; terminal newline present
Raw response SHA-256	048ec72600c582ca4d3041955300a27108aeecb5ec3eb571d3ae4ed3fd803cf6
Raw official item SHA-256	37044c2f20c8d7ad175740c6bfe78356296190d1b1c240390599d4873f9d17c0
Leading / trailing non-whitespace bytes	0 / 1
str.islower()	True
Uppercase / lowercase ASCII letters	0 / 249
Non-ASCII cased letters	[]
Local language detector / exception	en / None
Official-equivalent asterisk bullets	3
Official-equivalent hyphen bullets	0
Total recognized bullet count	3
Conventional asterisk bullet count	3
Non-whitespace material outside bullets	Absent
Official-equivalent bullet result	PASS
Official-equivalent lowercase result	PASS
Exact three-bullet result	PASS
Audit material in scored block	Absent

Manual task checks - separate from official score

Exactly three meaningful conventional bullets	PASS
No prose outside the bullets	PASS
John of Brienne and Maria of Montferrat identified	PASS
1210 marriage and kingship path identified	PASS
Zen-like framing present	PASS
Alliance, succession, and service framing	PASS
No invented authority or current fact	PASS
No audit material in scored block	PASS

13. Scores

Instruction-level score	2 / 2 encoded constraints passed
Prompt-level strict score	PASS
Prompt-level loose score	PASS
Final score	1 / 1 prompt-level strict pass
Official vs local discrepancy	None
Manual checks	Reported separately; not added to official IFEval score

14. Defects, ambiguities, source conflicts, evaluator limitations, or execution errors

No source conflict or official evaluator execution error was observed. The initial candidate passed private preflight with zero substantive corrections. No content was changed after lock.

BulletListChecker accepts its recognized asterisk and hyphen line patterns and does not require conventional Markdown semantics, meaningful content, or no extra prose. LowercaseLettersEnglishChecker combines Python's islower predicate with language detection and returns True on its LangDetectException path.

The official constraints do not assess whether the historical account is complete, whether the Zen-like style is persuasive, or whether the response is independently historically certified. The local and manual checks are separate from the official score.

ROUTE VERIFICATION NOT EXPOSED remains a material limitation. The requested Luna Max condition is recorded as supplied and is not proof of a hidden backend build or route.

15. Evidence status

Official item evidence	FROZEN - exact raw JSONL line preserved; raw-line SHA-256 recorded
Official checker evidence	FROZEN - instructions.py blob identity recorded
Scored response evidence	LOCKED - SHA-256 recorded before official evaluation
Official evaluator evidence	EXECUTED - direct, strict, and loose results recorded
Local-check evidence	EXECUTED - transparent mirror and manual checks recorded
Runtime-control package	HARNESS_SPECIFIED / NOT EXECUTED; runtime tests false; replay not executed; PackageReady false; not certified
PDF visual QA	PASS - final rendered pages inspected; no clipping, overlap, missing glyphs, or footer collision observed

16. Record-integrity statement

This is an INTERNAL ONE-SHOT RECORD for the requested FASTPATH 5.6 / LUNA MAX condition. The frozen item, initial candidate, zero disclosed preflight corrections, locked response, evaluator outputs, local checks, and PDF were recorded in order. Locked response SHA-256: 048ec72600c582ca4d3041955300a27108aeeb5ec3eb571d3ae4ed3fd803cf6. Official item-line SHA-256: 37044c2f20c8d7ad175740c6bfe78356296190d1b1c240390599d4873f9d17c0. The record preserves the observed result and does not claim certification, independent verification, leaderboard standing, guaranteed determinism, historical certification, or proof of hidden backend identity.
